

# SMART TECHNOLOGY FOR HEALTHCARE FACILITY

Carstens MEDIRoo's and WALLARoo medication and storage wall cabinets are available in a range of sizes with numerous colours to suit healthcare facility décor as well as providing secure lockable access to medications, small medical devices, medical supplies and IT devices such as Tablets, Laptops and Personal Computers.

The Isonas Access Control system enables further security controls for access by security swipe card, and additionally the Isonas system can be further supplemented with an integrated 10 number keypad making access even more difficult for unauthorised persons. The fold down door becomes a writing desk, and closes at a touch.

The wall cabinets are wall mounted on surface or flush

mounted as required. Installation of the wall cabinets with Isonas Access Controls only requires connection to an Ethernet cable with no extra cabling for Power over Ethernet, with rechargeable long life battery backup. The internal shelving configuration is customisable to your needs for medication, folders, laptops, or patient specific items.

You can further integrate your Mediroo or Wallaroo with Brother's TD2120 Patient Wristband and Hospital Label Printer with TrustSense Smart technology, which is fully compliant with Standard 5.

Contact DB Health to further discuss your needs or to book a demonstration.

## INTEGRATE

SMART TECHNOLOGY

### Carstens' Mediroo with ISONAS

Versatile workstations enhance security and improve workflow efficiencies... from pharmacy to point of care.
